Each school will approach their curriculums differently and may teach topics in a different order. Volcano Education can easily move things around to support what is being covered in school. If your child follows a different exam board at GCSE, let us know, as we do have experience with other exam boards. If it is an exam board that we have not come across, generally, the subject knowledge remains the same, but the application and case studies may be different. This isn't an issue.

Please do not hesitate to ask what is covered in each topic.
